

Programme

Applied Training on Integrated Planning and Reporting Toolkit (IPRT)

Organized by the Development Planning Section, Macroeconomics & Governance Division, ECA in collaboration with Ministry of Economy, Planning and Regional Development
26-29 July 2021, Yaoundé, Cameroon

Introduction

In 2015, the United Nations endorsed a global development agenda known as 2030 Agenda for sustainable development goals as well as a continental agenda, popularly known as Agenda 2063 to spearhead the transformation of the continent. As of now, many countries including African Members have embarked on the implementation of SDGs and Agenda 2063. As there are existing national development plans ongoing, countries made efforts to mainstream both SDGs and Agenda 2063 into their development plans. Concerns remain regarding the alignment of national development plans with continental and global development agendas. For this purpose, the United Nations Economic Commission for Africa (ECA) has developed a toolkit, namely, the Integrated Planning and Reporting Toolkit (IPRT) to support member countries to align continental and global development agendas with NDPs as well as assess the progress made by member States towards the achievement of SDGs and Agenda 2063 goals.

The IPRT has already been deployed in some member States and efforts are being made to include other member States by the end of 2021. The toolkit has been designed to improve development planning capacities of member States through the application of the IPRT.

Objective of the course

The main objective of the training is to enable member States know the functionalities of the IPRT and use it in planning and alignment of 2030 Agenda and Agenda 2063 with national development plans including the concomitant monitoring of the progress of the two agendas towards their implementation.
